# Mango

## The King of Fruit

**MANGOES** is one of the tropical fruits, commonly, called as 'King of fruits'. Pakistan is 5th largest producer and the 3rd largest exporter of mango in the world. Its soil and climatic conditions enable production and market supplies of good quality fresh mango over a period of about 4 to 5 months.

Pakistani mangoes are one of the most popular and best-loved fruits worldwide therefore enjoy a prominent position in the international market.

Because of its excellent flavor, delicious taste and healthful value, Pakistani mangoes are now recognized as one of the supreme fruit in the world market.

Mangoes, when ripe, usually change their color from green to yellow, skin thin, pulp fibre less, flesh firm, very sweet in taste, pleasant fragrance and small stone.

# Kinnow

## Mandarin

**Kinnow** is a member of citrus family. It is indigenous product from Pakistan. Many as the finest of all the citrus fruits regard this flavor with exquisite taste.

Pakistan as a national process about 12 per cent of the world's citrus fruits and stands among the top ten citrus growing countries in the world.

In Pakistan the Kinnow is grown under totally natural conditions to enhance the original flavor of the fruit and to preserve its fundamental goodness. The fruit is sun-ripened on the trees and carefully hand picked at precisely the right time of ripeness.

Kinnow juice in concentrated or liquid form is virtually exported to all over the world. Once treated with proper fungicide and wax and careful handling with storage of Kinnow at about +4 Degree Centigrade it can retain its freshness up to 60 days

# Potatoes

**POTATOES** has become an important crop for both farmers and consumers in Pakistan.

It is the fourth most important crop by the volume of production. It is high yielding, having a high nutritive value and relies for more than 99% on locally produced seed potatoes.

Today, Pakistan ranks in the world's top twenty potato nation. The percentage of the potato crop used for processing have steadily increased.

Pakistan produces Good quality, smooth and nature white & red skin, long and round shape potatoes.

Nutritionally, potatoes are best known for their carbohydrates content (approximately 26 grams in a medium potato)..

# Onions

**Onions** is one of the important condiments widely used in all households all the year round. Nature has given many beneficial and useful plants to mankind. One such wonderful plant is onion .onion is one of the oldest cultivated herbs.

Many archeologists believe that they were first grown Iran and Pakistan. According to the United Nations Food and Agriculture Organization Pakistan is the fifth leading onion production country now.

It is a wonderful vegetable. It would have been a fruit if it had not been pungent and full of sulfuric compounds.

It comes in varying shapes and sizes; and has beneficial properties for health particularly being fat free. igrade it can retain its freshness up to 60 days.

# Rice

For nearly half the world's population, rice is life. Rice provides one of the main sources of calories for billions of people.

It is a staple, a comfort food, a side dish and a main meal. In fact, rice is so integral to many cultures around the world it is often intermingled with mythologies, gods and goddesses, ceremonies and celebrations.

It's also a highly nutritious component of a healthy diet, if you choose the right source. Generally all rice both brown and white is considered a good source of vitamins and minerals.

Rice is a fair source of protein containing all eight essential amino acids.
